CENTRAL INTELLIGENCE AGENCY
WASHINGTON, D.C. 20505

10 MAR 1983

Mr. Robert A. Smoak
Chief, Division of Enforcement
and Security Management
Department of the Interior
Washington, D. C. 20240

Dear Mr. Smoak:

Your letter of February 8, 1983 to the Director of Central Intelligence requesting reports on 95 countries in connection with defensive security briefings for Department of the Interior employees involved in foreign travel has been referred to me for response.

I understand that the early January Interagency Conference mentioned in your letter was chaired by the Department of State, with participation by the Defense Intelligence Agency and the Department of Energy. It is our considered view that the Department of State is in the best position to provide you with current data concerning various countries with which we maintain diplomatic relations. In fact, it is normally suggested that all travelers be advised to consult with the United States Embassy for timely information concerning the country being visited.

I have been advised by the Agency's Director of Security that the DCI Security Committee periodically reviews the list of countries considered hazardous for personnel with access to Sensitive Compartmented Information (SCI). A copy of that list is enclosed and arrangements can be made to provide you with additional copies anytime the study is updated.

The Department of Energy has developed an excellent video cassette of a defensive briefing for foreign travel. Our Special Security Center has made a copy available to your Geological Survey at Reston, Virginia. I suggest that the judicious use of this security training aid would go far toward solving the problem described in your letter.

Executive Director

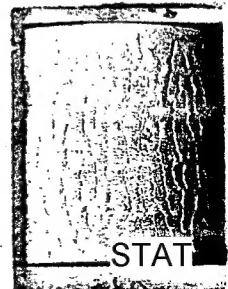

NOTE FOR: DDA

Harry:

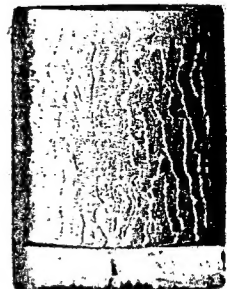

As my vigilant comrade has noted:

"While CIA should have some information to contribute, what Interior is asking for is advice which is the responsibility of the Department of State. State should be advising other agencies as to whether it is safe and whether they agree to travel to selected areas of the world."

Informal liaison with Interior and a carefully worded letter would shift this potentially burdensome task to State, where it belongs.
